MAIN SKILLS (ADVANCED)

C#, .NET Core, Angular, TypeScript, JavaScript, HTML, CSS, SCSS, Git.

EXPERIENCE

1. **Full-Stack Engineer at The Vintage Bar (September 2021 - current):** I've been working on the development and maintenance of a marketplace of pre-owned designer luxury for women. **Techs and tools:** Angular 13, .NET 6, TypeScript, HTML, SCSS, Git, Azure, MySQL, Asana.
2. **Full-Stack Engineer at GFT (November 2020 - September 2021):** worked in partnership with B3 (Brazil Stock Exchange) to develop web applications.
Techs and tools: .NET Core, Angular 11, TypeScript, HTML, CSS, SCSS, Git, MSSQL, JIRA.
3. **Full-Stack Engineer as International Freelancer (February 2021 - September 2021):** development of a B2B SaaS that aims to improve the management of brands and their partners.
Tech and tools: C#, .NET Core, EF Core, RabbitMQ, MassTransit, PostgreSQL, DDD, Git, Visual Studio.
4. **Full-Stack Developer as National Freelancer (August 2018 - September 2021):** responsible for planning and development of two web applications. The first integrates with REDESIM (a system that manages the opening and closing of companies in the state) and a domestic legacy system. The other one allows citizens to create and process requirements/documents between public offices/departments of a city.
Techs and tools: React (with Hooks), React-Redux, Angular 9, JavaScript, TypeScript, HTML, CSS, SCSS; Node, ASP.NET Core, EntityFrameworkCore 2, Serilog, Dapper; Git, SQL Server, Visual Studio, Visual Studio Code;
5. **Full-Stack Engineer at PBSOFT (January 2018 - October 2020):** team leader and scrum master. Planning and development of "SAGRES Captura" and "SAGRES Online", both systems are responsible for monitoring and auditing the money of the state of Paraíba for the Court of Auditors of the Paraíba State.
Techs and tools: Angular 10, TypeScript, JavaScript, HTML, CSS, SCSS, Scala, Play Framework, Git, MSSQL, PostgreSQL, JIRA.
6. **Full-Stack Developer as Freelancer (February 2018 - July 2018):** planning and development of "Sycomm", a web application responsible for managing employees and scheduling tasks.
Techs and tools: Angular 2+, TypeScript, Ruby on Rails, HTML, SCSS, PostgreSQL.
7. **Full-Stack Developer at E.life (April 2016 - December 2017):** development and maintenance of a social media monitoring system.
Techs and tools: Ruby on Rails, Angular 1.X, HTML, CSS, JavaScript, CoffeeScript, MongoDB, Git, Trello, Scrum.
8. **Web Developer as Freelancer (January 2016):** development of a Google Chrome plugin to communicate with a recruitment app. **Techs and tools:** Ruby on Rails, JavaScript, jQuery, Sass, HTML, Git.
9. **Full-Stack Developer as Freelancer (November 2015 - January 2016):** planning and development of a customized blog called "Dícore Interiores".
Techs and tools: Ruby on Rails, Bootstrap, Sass, HTML, Git.
10. **Full-Stack Developer at Dynavideo (August 2013 - April 2016):** development of ICD (a Portuguese acronym for Digital Content Exchange - DCE): an application that allows users to upload and share digital content (videos, images, audios, documents, files in general) between television associates (nodes through the network). It is focused on the Brazilian public television and used by "TV Brasil" channel since 2009; Development of ICD Portal: a website that allows users to visualize the media uploaded from the ICD application. Development of the "RUTE Server", a system that allows the creation and management of streaming sessions in 4k resolution. It is very useful for transmitting live surgeries to medicine students;
Techs and tools: Java (JSF, EJB, Spring Boot), Maven, PrimeFaces, PrimeFaces Push, EclipseLink, JPA,

Glassfish 4, PostgreSQL, JavaScript, jQuery, HTML, CSS, Bootstrap, SVN, Eclipse IDE, IntelliJ IDEA, iReport.

11. **Software Engineer at Phoebus Tecnologia** (January 2013 - June 2013): development and implementation of applications regarding credit card transactions; Systems documentation like UML diagrams, system manuals, best practices guide, etc; Creation of Oracle PL/SQL scripts.
Techs and tools: Java, Flex, Maven, Oracle, PL/SQL, MS SQL Server, Birt design (an Eclipse IDE plugin to create reports), Scrum, Kanban, Astah, Log4j, CVS.
12. **Full-Stack Developer at Indra Company** (July 2012 – December 2012): in partnership with TJPB (an acronym in Portuguese for Paraíba's Court of Justice), I worked on the development of web apps for the legal environment needs.
Techs and tools: HTML, CSS, JavaScript, jQuery, JSF, 2, RichFaces, PrimeFaces, JSP & Servlets, JPA, Hibernate, adapted Scrum, Redmine, SVN, Eclipse IDE.
13. **Full-Stack Developer at Integrativa** (January 2012 – May 2012): development of an application used to manage SEBRAE (an acronym in Portuguese for Brazilian Service to Support Micro and Small Enterprises) events; Development of an e-commerce application responsible to make the management of event reservations.
Techs and tools: HTML, CSS, JavaScript, jQuery, VRaptor 3 (a Brazilian Java framework based on spring), Hibernate, MS SQL Server, MySQL, Maven, Redmine, Log4J, adapted Scrum, UML, SVN, Eclipse, iReport.
14. **Intern at Information Technology Center of the Paraíba's Federal University** (January 2011 – December 2011): development of the Paraíba's Federal University's Electronic Clocking-on System. This application allows people to register their daily work hours via a web application. Long before that, the clocking-on and the clocking-out used to be by pen and paper registration. So, I helped to build an application that makes this process easier and safer. Also worked on the creation of Oracle PL/SQL scripts. **Techs and tools:** HTML, CSS, JavaScript, JSF, RichFaces, Eclipse IDE, Oracle PL/SQL, EclipseLink, adapted Scrum, Redmine, SVN.

EDUCATION

- **Graduation in Internet Systems Development** – Paraíba's Federal Institute of Education, Science and Technology (2008 - 2011)
- **Post Graduation in Mobile Systems Development** – Estácio iDez (2011 - 2012): as the final project of my post-graduation course, using the Phonegap framework I developed an application for retrieving the judicial processes of the Paraíba's Court of Justice through web services. You can check it at <https://github.com/rom5jp/judicial-processes-consulting-service>.

LANGUAGES SKILLS

- **Portuguese:** native speaker;
- **English:** advanced;
- **Spanish:** beginner;

BACKGROUND ACTIVITIES

- **Volunteer experience** (June 2015): I taught Portuguese to students from the National Autonomous University of Mexico. I worked with an agenda based on human development, cultural diversity, social impact, leadership, business, entrepreneurship, and globalization.
